BURHAN MOHAMED

PROFILE

I am a highly motivated and dedicated Computer and Information Science Honours graduate, with distinction. I am passionate about my field of study and its applications in solving real-world problems, constantly expanding my skills in new areas of technology. My understanding of IT allows me to approach challenges from both a technical and practical perspective. With hands-on experience in full-stack development and software engineering, I am excited to contribute to impactful software solutions, while eager to continuously learn and collaborate.

EDUCATION

Tertiary Education:

IIE MSA

Bachelor of Computer and Information Science (Honours) 2025
- With Distinction

Bachelor of Computer and Information Science 2022-2024
- With Distinction

Secondary Education:

Greenside High School

National Senior Certificate (Bachelor's Degree Pass) 2020

EXPERIENCE

Software Engineer May 2026 - Present
AI Capone

- Manage and maintain the Shopify CMS platform for eight of the company's retail websites, handling content updates and daily ecommerce functionality.
- Customise and enhance website designs using Liquid, HTML and CSS to improve user experience, while collaborating on marketing designs to ensure consistent branding and design language..
- Create and generate custom reports covering sales, inventory and customer retention using the Shopify GraphQL API and ShopifyQL, providing insights to support business decision-making.
- Maintain and handle an internal employee management system built with Next.js, React, and Supabase, enabling store managers to coordinate staff operations across multiple stores and branches.
- Built Python scripts for accounting, integrating with the POS Retail Pro API to automate the processing of financial data for reporting and reconciliation.

Full-stack Developer Jan 2024 - Dec 2024
J2 Software
Real-Time Security Monitoring and Alert Management System

- Led both frontend and backend development, using Angular for the user interface and Golang for the backend.
- Developed an interactive dashboard to visualise security alerts, incorporating features such as filtering, sorting and archiving.
- Designed core functionalities, including PDF report generation, alert prioritisation and multifactor authentication.
- Implemented accessibility options, such as dark mode, language localisation and adjustable text sizes.

SKILLS

Java	Windows PowerShell	TypeScript	CI/CD
C#	Oracle Database	GitHub	ASP.NET
